Product Fact Sheet

TuneView

Connections for your Computer keyspan.com

TuneView remote
and USB transceiver

Control iTunes Throughout Your House!

TuneView combines a wireless LCD remote and USB transceiver. It provides a way to remotely view the contents of an iTunes library and manage iTunes throughout your house. TuneView controls your playlists, music library, streaming radio, and even videos.

TuneView is an ideal compliment to AirPort Express and to other solutions that stream iTunes content to a stereo system or to whole house audio systems.

How It Works

Connect the TuneView USB transceiver to a USB port on a PC or Mac that is running iTunes. Pick up the TuneView remote.

The transceiver and the remote communicate with each other via a 2.4 Ghz radio signal that works through walls.

TuneView software running on the computer queries iTunes each time that information is needed and transmits this data to the remote.

With the color LCD screen and the ten keys provided on the remote, you can browse iTunes and control iTunes without returning to the computer.

Contents

- TuneView USB transceiver
- TuneView Remote with two AA batteries
- USB Cable

Part #: TVU-200C
MSRP $179.99
Pro Version: $249.99
